**B**attle Architects, under the direction of John Battle, is dedicated to inspired design and impeccable client service. We balance our commitment to unique design with each client's lifestyle and preferences.

Our designs emerge from a specific sense of place. Each project celebrates

the strengths of its site, ranging from sun exposure to views of the water's edge. We develop our architecture to capitalize on these assets while creating inside spaces that are comfortable yet exceptional experiences for our clients. We consider ourselves to be problem-solvers, reconciling the constraints of lifestyle, budget, and

site, while staying true to our design philosophy.

Client service reflects our commitment to give each client distinct attention. We are committed to listen and to respond, throughout the design process and beyond.

- ① Oriented to capture the magnificent views of Lake Winnepesaukee, this 20,000-square-foot home was designed with a grand vision of scale and respect for the landscape.
- ② Three volumes emerged to address two specific professions—art and music. The contemporary main home is flanked by an atelier and a music studio.
- ③ The design of this traditional kitchen features custom cabinetry, beadboard ceiling, and reused exposed beams. The project created an open plan with an adjacent family room.
- ④ Enclosed in a new barn, this music studio features wood-lined walls that baffle and soften the sound while the high-peaked ceiling allows it to travel through space.
